

**Action Project #1**  
**Feedback of 2001 Annual Update**  
**“Construct and Implement a Dynamic Institutional Planning Process at Central  
Arizona College”**

The following was taken from the feedback correspondence received from Steven Spangehl and dated January 8, 2002:

**Action Project 1: Construct and Implement a Dynamic Institutional Planning Process at CAC**

*It appears as if Central Arizona College’s efforts on this action Project are proceeding fairly smoothly, yet you might consider tracking your progress, impact and perceptions in a more robust manner; and tying the planning process more tightly to your budgeting process.*

*While the AQIP Guiding Values of **Involvement** and **Foresight** are clearly key to this Action Project, CAC’s progress on this Project illustrates an apparent opportunity to build further connections within your institution regarding the AQIP Guiding Value of **Information**.*
